

## LF/MF

You must register with the UTC before using the 2200M or 630M bands

## HF

# US Band Plan

## HF

## VHF

## UHF

## SHF/EHF

E,G,T are licensed on all modes on the following frequencies  
 2300-2310MHz 2390-2450MHz 3300-3500MHz 5650-5925MHz  
 10.0-10.5GHz\* 24.0-24.25GHz 47.0-47.2GHz 76.0-81.0GHz  
 122.25-123.0GHz 134-141GHz 241-250GHz >275GHz  
 \*No Pulse emissions

## Legend

## Notes

Maximum transmitter power is 1.5kW PEP  
 Repeater offset - 2m:600kHz, 70cm:5Mhz

Simplex Calling Frequencies

70cm: FM: 446.000MHz  
 SSB: 432.10MHz  
 2m: FM:146.520MHz  
 SSB: 144.200MHz

Baofeng

Dual Watch - menu 7, Power - menu 2

Call - FM Broadcast

1. VFO/MR for Freq Mode, A/B for side A

2. Select BAND

3R. Clear CTCSS/DCS, delete existing data (menu 28)

4. Enter Frequency

5R. Enter offset (menu 26), shift (menu 25) 1=pos, 2= neg

6. Set CTCSS/DCS

7R. Enter repeater output freq

8. Save menu27

RX DCS (menu 10), RX CTCSS (menu 11)

TX DCS (menu 13), TX CTCSS (menu12)

Yaesu FT-70D

108-137MHz/137-174MHz/174-222MHz

222-420MHz/420-470MHz/470-480MHz

HM/RV to reverse transmit and receive

To set

1. Set frequency and mode (V/M, type freq)

2. Set offset direction (F-0) RPT-/RPT+/Simplex

3. Set repeater mode (F-5)

OFF/TONE(CTCSS tone)/TSSQL(CTCSS tone and squelch)/DCS

4. Set CTCSS frequency (F-6)

5. Set power (F-1) Low:0.5W, Mid:2W, High:5W

To save

1. Press V/M for 1 sec, use dial to find spot

2. Press V/M

3. To label use dial, mode/band/gm, press V/M

Comet HFJ-350M Antenna

100W Peak/50W Average

Lengthen for lower freq, shorten for higher freq

Counterpoise - AWG12

1.8MHz: 1170mm 7kHz/cm 2 coil 40m

3.5MHz: 910mm 20kHz/cm 1 coils 20m

7MHz: 960mm 25kHz/cm 0 coils 12m

10MHz: 990mm 40kHz/cm Term1

14MHz: 800mm 60kHz/cm Term2

18MHz: 1070mm 50kHz/cm Term2,3

21MHz: 750mm 80kHz/cm Term3

24MHz: 530mm 100kHz/cm Term3

28.5MHz: 1000mm 120kHz/cm Term4

51MHz: 950mm 100kHz/cm Term 5
